

CANADIAN FLOATING RATE (CLASS CF)

As at June 30, 2008

Investment Objective

The investment objective of the Fund is to generate income with low interest rate risk and with moderate risk of principal loss. The Fund aims to achieve this strategy through exposure on a leveraged basis to the performance of an actively managed portfolio principally comprised of adjustable rate senior secured loans (the "Floating Rate Portfolio"). While the Floating Rate Portfolio will generally be invested in U.S. dollar denominated assets, it is intended that at all times at least 90% of the net asset value of the shares will be hedged back to the Canadian dollar. The annual returns are expected to be approximately LIBOR plus 2-4% (Hedged).
